Session 11:

New Moon Ritual

New Moon

June 2021 New Moon:

This New Moon is in Gemini - an air sign.
It is an annular solar eclipse (not all of the Sun will be darkened).
And it overlaps with Mercury retrograde.
It may bring mental confusion, vulnerability and deceptive communications; self-confidence and courage, but also a tendency toward recklessness, belligerence, and treachery.

What is your intention for this New Moon? What would you like your intention to help you with?

*Sound
Your Truth*

Each Chakra has a different vibration - and so it produces a different sound. We can source our voice in each of them. Based on which energy center your voice comes from, you will project different energy and it will be received differently by people.

In life, everything we do, we do it to either:

- move closer towards pleasure
- move away from pain

When you move closer towards pleasure, you say YES to something. And when move away from pain, you say NO.

Most of our YES'es and NO's are weak, because they are not supported by the right chakra.

Your Sacral Chakra (lower belly) is about emotions, pleasure, sensuality and sexuality. If you source your YES from here, it will be much more powerful.

Your Solar Plexus/Navel Chakra (upper belly) is about personal power, focus, determination, self-identity, ego. If you want to strengthen your NO, source it here.

You can play with saying YES & NO from different chakras to notice how different they sound and feel.

Thank you
